

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. P R E F A C E .

TWENTY years ago, when the author first became interested in German medical literature, he found but little assistance from dictionaries. As the Germans have no medical dictionary corresponding to Dunglison, and many of the definitions given in the ordinary dictionaries are erroneous, he was in the habit of writing down the technical words encountered in reading, with their meaning when this could in any way be ascertained. The manuscript at last became so voluminous as to be inconvenient, and it was then determined to have it printed, for the author's convenience and for the assistance of other students.

Though interested mainly in the literature of the eye and ear, the author's reading has been quite general, and the technology of the several branches of medicine will be found well represented.

It is possible, as the author is not a German, that various errors have escaped his attention, that some important words have been overlooked, and that material improvements can be made in a future edition. Suggestions as to such improvements will be very thankfully received.

Zwiewüchsig, *a.*, *v.* Zweiwüchsig.

Zwilling, *m.*, (*gen.* -s, -es; *pl.* -e) twin, gemellus; —e gebärend, gemelliparous.

- Zwilligsfrucht, *f.*, twin foetus.
 Zwillingsgeburt, *f.*, twin-birth.
 Zwillingskind, *n.*, twin child.
 Zwillingsmuskel, *m.*, gemellus muscle.
 Zwillingsschwangerschaft, *f.*, twin pregnancy.
 Zwingenwulst, *f.*, gyrus for-cipis.
 Zwink, *m.* (*gen.* -s, -es; *pl.* -e) wink.
 Zwinken, *v. n.*, (*aux.* haben) to wink.
 Zwischen, *prp.*, (with *dative & accus.*) between; among; — Fell und Fleisch steckend, intercutaneous; — den Kinn-laden liegend, intermaxillary; — den Knochen liegend, interosseous; — den Lungen-flügeln, interlobular; — den Muskeln befindlich, intermuscular; — den Rippen liegend, intercostal; — den Wirbelbeinen befindlich, intervertebral.
 Zwischenband, *n.*, (*pl.* Zwischenbänder) intervertebral or interspinal ligament; inter-articular cartilage or ligament, meniscus.
 Zwischenbogenbänder, *pl.*, ligamenta subflava.
 Zwischendornmuskel, *m.*, inter-spinal muscle.
 Zwischenfurche, *f.*, sulcus in-termedius.
 Zwischen gelenkknorpel, *m.*, interarticular cartilage.
 Zwischengewebe, *n.*, interstitial tissue.
 Zwischenhirn, *n.*, intermediate or second cerebral vesicle (of the embryo); embryonic optic thalami.
 Zwischenkanal, *m.*, interme-diate canal; — der Leber, canalis interlobularis.
 Zwischenkiefer, *m.*, intermaxil-lary, incisive, palatine or labial bone.
 Zwischenkieferknochen, *m.*, ossa incisiva, intermaxillary bone.
 Zwischenknochen, *m.*, Wormian bone, ossa triquetra.
 Zwischenknochenarterie, *f.*, interosseous artery.
 Zwischenknochenband, *n.*, in-terosseous ligament.
 Zwischenknochenblutader, *f.*, interosseous vein.
 Zwischenknochenhaut, *f.*, in-terosseous membrane.
 Zwischenknochenmuskel, *m.*, interosseous muscle.
 Zwischenknochenrand, *m.*, crista interossea.
 Zwischenknochenraum, *m.*, in-terosseous space.
 Zwischenknochenschlagader, *f.*, interosseous artery.
 Zwischenknorpel, *m.*, inter-articular cartilage.
 Zwischenknorpelbänder, *pl.*, intercartilaginous ligaments; annuli ligamentosi (between the tracheal rings).
 Zwischenkörnerschicht, *f.*, in-tergranular layer.
 Zwischenlagerung, *f.*, intersti-tial deposit.
 Zwischenmuskel, *m.*, interosse-ous muscle.
 Zwischenmuskelband, *n.*, inter-muscular ligament.
 Zwischenquerfortsatzmuskel, *m.*, intertransversalis.
 Zwischenquermuskel, *m.*, inter-transverse muscle.
 Zwischenraum, *m.*, interstice.

- Zwischenrippenfurche**, *f.*, intercostal groove.
Zwischenrippenmuskel, *m.*, intercostal muscle.
Zwischenrippennerv, *m.*, intercostal nerve.
Zwischenrippenraum, *m.*, intercostal space, interstitium intercostalis, mesopleurium.
Zwischenrippenschlagader, *f.*, intercostal artery.
Zwischenscheitelhirn, *n.*, lobus occipitalis.
Zwischensehne, *f.*, intermediate tendon.
Zwischenstachelmuskel, *m.*, interspinous muscle.
Zwischenvene, *f.*, intermediate vein; — der Leber, vena interlobularis.
Zwischenwirbelband, *n.*, intervertebral ligament.
- Zwischenwirbelknorpel**, *m.*, intervertebral cartilage.
Zwischenwirbelloch, *n.*, intervertebral foramen.
Zwischenwirbelscheibe, *f.*, intervertebral disc.
Zwischenwirbelspalt, *m.*, fissura intervertebralis.
Zwitter, *m.*, (*gen.* -s; *pl.* —) hermaphrodite, hybrid.
Zwitterbildung, *f.*, hermaphrodite, androgynus, hybrid.
Zwölffingerdarm, *m.*, duodenum.
Zwölffingerdarmschlagader, *f.*, duodenal artery.
Zygomatisch, *a.*, zygomatic; die —e Naht, the zygomatic suture.
Zygomatischerbogen, *m.*, zygomatic arch.
Zylindrischeepithel, *n.*, cylinder epithelium.
